Summer School on Software Engineering

Free University of Bozen-Bolzano, Italy

September 13-15 2016

Bolzano, BZ, Italy

<http://seschool2016.inf.unibz.it>

The 2016 Summer School on Software Engineering hosted by the Free University of Bozen-Bolzano is a three-day event (September 13-15, 2016) featuring **five tutorials** delivered by leading researchers in the software engineering field.

The school is mainly intended for PhD and Master students interested in the latest findings in software engineering.

Program

Prem Devanbu, University of California (USA)

On the Naturalness of Software, and how to exploit it for Fun and Profit

Massimiliano Di Penta, Università del Sannio (Italy)

Applying Search-Based Optimization Techniques to Software Engineering Problems: Challenges and Practical Solutions

Rocco Oliveto, Università del Molise (Italy)

Learning Empirical Software Engineering from my Mistakes

Mauro Pezzè, Università della Svizzera italiana (Switzerland) and Università di Milano Bicocca (Italy)

Self-healing Software Systems

Denys Poshyvanyk, The College of William and Mary (USA)

Maintaining and Evolving Mobile Apps

Registration

The registration fee is 80€ and includes attendance to the five tutorials, lunches during the three days of the summer school, a social dinner scheduled on September 14 2016, and coffee breaks.
